

A New Quick and Easy Way to Get Lunch

While your child was out of school enjoying their summer, the M-DCPS Department of Food and Nutrition was busy installing a Reimbursable Meal Vending Machine at your child's school. The refrigerated reimbursable meal vending machine allows for service of fresh and healthy entrée salads, yogurt parfaits, fresh fruits and vegetables, cheese and meat wraps, sandwiches, milk, 100% juices and a variety of other fresh, complete meals to more students in less time. **The machines are cashless.** Students use their student Id # and birth date and the machine registers their eligibility and deducts money from their lunch account if necessary. What this means to you is if your student normally pays for lunch they will need to have money in their cafeteria account. You can put money in their account by going to www.paypams.com or you can send a check or cash to school with them and they can have the cafeteria staff add it to their account.
